

## Summary

Aspiring Computer Science Engineer passionate about Java Full Stack Development and building impactful applications. Experienced in developing personal and academic projects with a focus on creating efficient and user-friendly applications. Looking forward to contributing to innovate projects while continuously enhancing technical and management skills in growth-oriented organization.

## Work experience

### Techwing

May 2025 – July 2025

#### Java Full Stack Intern

- Gained hands-on experience in developing web applications using both frontend and backend technologies, enhancing full-stack development skills.
- Improved backend performance by optimizing SQL queries and refining database structures, resulting in faster data retrieval.

### AIMER Society

May 2024 – July 2024

#### AI Intern

- Developed Machine Learning, Deep Learning, and NLP models by applying innovative techniques to solve real-world problems.
- Implemented YOLOv8-based object detection, achieving improved accuracy and performance in image recognition tasks.

## Education

### BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE AND ENGINEERING

Godavari Institute of Engineering and Technology  
CGPA: 8.9

2022 - present  
Rajahmundry

### INTERMEDIATE, MPC

Sri Chaitanya Junior College  
CGPA: 9.5

2020 - 2022  
Rajahmundry

## Skills

SQL

HTML / CSS

Java

Spring Boot

## Projects

### A Privacy Focused Face Recognition System with Cancellable Biometrics

- Developed a secure face recognition system that ensures user privacy by transforming facial data into non-reversible cancellable biometric templates and encrypting them.
- The system detects faces using Haar Cascade and extracts features with LBPH, enabling accurate and real-time authentication while preventing data misuse and identity theft.

### TrackMyLeave, a Student-Faculty Leave Tracker (HTML, CSS, Java (JDBC))

- Built a Leave Management System using Servlets, and JDBC with MySQL database on RDS.
- Implemented student and faculty login with leave apply, approval, and status tracking features.
- Designed JSP pages for a user-friendly interface with dynamic data handling and cloud storage.
